POPULATION GUIDE

Every repository knowledge product is authored to this shape — a one-sentence **KERNEL** (≤30 words), a structured **BRIEF** (150–250 words), and a sectioned body — so it is searchable by country, technical area, year and project component, and citable with machine-readable metadata.

Brief

A digital system only delivers if the officer at the crossing can use it confidently, and this recorded webinar closes that gap. It walks a screening officer through the Version 2 Digital POE system from login to case referral: registering a traveller, recording screening findings, flagging and isolating a suspected case, referring to the health facility, and reviewing the day's data. Recorded during the national deployments in Zambia, Rwanda and São Tomé, it doubles as onboarding content in the learning centre and as a refresher officers can watch on a phone at the crossing. It is paired with the harmonised POE SOPs so that what officers see on screen matches the procedure they are trained to follow.

What it covers

The walkthrough follows the full officer workflow — traveller registration, screening capture, case flagging, isolation, referral and end-of-day review.

How to use it

The recording serves both as first-time onboarding and as a quick refresher accessible on a mobile device at the crossing.

ABOUT THE REPOSITORY

The Regional MPA Repository organises the programme's knowledge around six pillars — Regional Knowledge Hub, Country Knowledge Pages, Technical Knowledge Repository, Learning Centre, Best Practice & Innovation Portal, and the Regional Collaboration Portal — serving the 11 participating countries.
