POPULATION GUIDE

Every repository knowledge product is authored to this shape — a one-sentence **KERNEL** (≤30 words), a structured **BRIEF** (150–250 words), and a sectioned body — so it is searchable by country, technical area, year and project component, and citable with machine-readable metadata.

Brief

Hospital-acquired infections are common, costly and largely preventable, and this course gives frontline staff the practical skills to prevent them. Hosted on the ECSA-HC e-learning platform, it covers the chain of infection, hand hygiene and standard precautions, environmental cleaning, device-associated infection bundles, and surveillance of HAIs. It is aligned to the regional IPC-AMR curriculum and to the HAI training-of-trainers package validated with Africa CDC, so that self-paced learners and classroom trainees receive the same content. The course uses short video demonstrations, knowledge checks and a downloadable job aid, and issues a certificate on completion that feeds the workforce-competency record.

Course structure

Six short units move from the chain of infection through standard precautions to device-bundle care and HAI surveillance.

Alignment

Content mirrors the regional IPC-AMR curriculum and the Africa CDC HAI ToT package so all learners get one consistent standard.

ABOUT THE REPOSITORY

The Regional MPA Repository organises the programme's knowledge around six pillars — Regional Knowledge Hub, Country Knowledge Pages, Technical Knowledge Repository, Learning Centre, Best Practice & Innovation Portal, and the Regional Collaboration Portal — serving the 11 participating countries.
