POPULATION GUIDE

Every repository knowledge product is authored to this shape — a one-sentence **KERNEL** (≤30 words), a structured **BRIEF** (150–250 words), and a sectioned body — so it is searchable by country, technical area, year and project component, and citable with machine-readable metadata.

Brief

Mozambique joined the HEPRR-MPA programme in 2025. With a population of 33.9M and its capital at Maputo, it carries a composite emergency-risk band of "Very High". 11 provincial directorates; INS national institute of health leads laboratory and surveillance functions. Cyclones and cholera, conflict-related displacement in Cabo Delgado, and a 2,700 km coastline with major seaports. This profile consolidates the country context that frames every preparedness decision — health-system structure, the hazards most likely to escalate, and the current state of IHR core capacities — into a single citable page that anchors the country knowledge page and feeds the regional dashboard.

Country context

Capital: Maputo. Population: 33.9M. MPA cohort: joined 2025. Composite emergency-risk band: Very High.

Health-system overview

11 provincial directorates; INS national institute of health leads laboratory and surveillance functions.

Emergency-risk profile

Cyclones and cholera, conflict-related displacement in Cabo Delgado, and a 2,700 km coastline with major seaports.

MPA preparedness status

Indicative SPAR-style readiness for this profiling round is 54%. The country page links this profile to its NAPHS, contingency plans, assessments and the knowledge products contributed by Mozambique.

ABOUT THE REPOSITORY

The Regional MPA Repository organises the programme's knowledge around six pillars — Regional Knowledge Hub, Country Knowledge Pages, Technical Knowledge Repository, Learning Centre, Best Practice & Innovation Portal, and the Regional Collaboration Portal — serving the 11 participating countries.
